

# Progress Report: Group Sessions

**Student name:** Hüseyin Yağız Devre

**Professor name:** Professor Sameer Pradhan

**Date of report:** 05/04/2020

**Author of report:** Dominick Bruso

**Number of sessions occurred:** 4

**Attendance (absence):** 1 excused absence was the 1st group session when he was not yet enrolled

**Attendance (latenesses):** 0 latenesses

**Assignments (total assigned):** 1

**Assignments completed:** 1

**Feedback:**

Hüseyin had 1 assignment and 1 assigned reading which he completed well and with less time than the other students as he joined the cohort late. He was able to show knowledge and competency through his work and his work was done on time and handed into the professor before the session for review.

Going forward, make sure to attempt the quizzes that will be sent to you by Professor Pradhan and make sure to complete the exam by the end of May.

**Feedback:**

Though starting the program late, Hüseyin has done an outstanding job in catching up on his work and being prepared for the group sessions. Hüseyin is very ambitious and has been looking into solving some extremely difficult problems and is looking at highly complex topics. Make sure to slow down and get a strong grasp of the foundations covered in the group sessions so that you have a strong starting point for your research. We know you have the ability and believe you will produce outstanding research.

In preparation for the individual sessions, the best advice is to continue to complete your assignments and with as much accuracy as possible. Being prepared for the upcoming quiz and exam will be essential for your preparation for the research and individual sessions. Make sure to continue to follow the directions posted in Schoology by Professor Pradhan as well as to request a recording of your individual sessions if you need to review them for clarification of expectations. Meeting your deadlines and completing your research on time will be of great benefit!

30 South 15th Street, 15th floor  
Philadelphia, PA 19102
